## Objective

Dedicated and results-driven Web Developer with a strong focus on React, seeking to leverage my technical expertise and creative problem-solving skills to build and optimize user-centered web applications. Passionate about collaborating in agile environments to deliver responsive, high-performance solutions that meet and exceed business goals.

## Professional Work Experience

Developed and optimized responsive web applications using React ensuring scalability, performance improvements, and seamless integration with third-party APIs.

## Professional Summary

- Innovative and **detail-oriented Web Developer** with a focus on building interactive and high-performance applications using **React**.
- Strong expertise in **HTML5, CSS3, JavaScript Tailwind** and front-end development techniques to create dynamic, user-friendly web experiences.
- Experienced in **integrating APIs** and working with modern web technologies to drive business growth.
- Adept at implementing clean, efficient code and optimizing applications for better speed and scalability.
- Committed to continuous learning and staying up-to-date with the latest **web development trends**.

## Skill Set

- **Primary Skill** - React(Html5,css3,JavaScript ) React native(Tailwind css,node.js)
- **Secondary Skills**- Python,Flask,Django,web scraping.
- **Database Used**- MongoDB
- **Tools Used**- VS-code,github,git

## Project Experience

### Cloud Data Warehouse Migration

*October -2024-present*

*Client: rdvisiontech*

*Domain: CRM*

*Role: Landing page.*

### Project Description:

- Developed a **CRM landing page** using **React** to streamline customer interactions and boost user engagement. Integrated interactive forms and dynamic content sections, allowing users to easily sign up, log in, and access CRM features. Implemented **Redux** for state management, enabling seamless data flow across component.

### **Roles and Responsibilities:**

- Develop responsive and interactive web applications using **React** and **Redux** for efficient state management and a smooth user experience.
- Create modular, reusable components and integrate REST APIs to enable dynamic data handling across.
- Collaborate with cross-functional teams, optimize performance with lazy loading and code splitting, and perform debugging and testing to ensure high code quality.

### **Personal Project Experience**

1- Lens kart clone | [Github](#)

#### **Project Description:**

**Lens Cart** clone to simulate an e-commerce platform for eyewear, providing a full shopping experience including product browsing, filtering, and checkout.

***Technologies Used:**html,css,JavaScript ,react tailwind css node,Mongodb,redux,git,Axios.*

2- **Text Analyzer**- Built a real-time **Text Analyzer** application using **React** to analyze text metrics, including word count, character count, reading time, and keyword density.

***Technologies Used:**html,css,JavaScript ,react tailwind.*

3-**Tic Tac Toe** game - Developed an interactive **Tic Tac Toe** game in **React** with dynamic gameplay and intelligent features. The game allows two players to compete, with real-time updates and a reset functionality. Used **React hooks** to manage game state, track player turns, and check for a winner or tie after each move.

***Technologies Used:**html,css,JavaScript ,react tailwind.*

### **Academic**

- Master of computer application[MCA] 2021  
*SRM University **CGPA 7.64** Ghaziabad NCR*
- Bachelor of computer application [BCA]
- PURVANCHAL University 65% *Varanasi Uttar Pradesh* 2018
